The IEEE North Jersey Advanced Communications Symposium is a one-day technical symposium covering wireless communication and related topics. The symposium will be held at the Babbio Center, Stevens Institute of Technology, Hoboken, NJ, on Saturday, September 21, 2013. The symposium consists of eight invited presentations and a parallel poster session. The posters will be on display all day and a special dedicated exhibition hour is scheduled for the presentation of the posters to all attendees. Poster presenters will have ample opportunities to interact with all attendees.

The organizing committee is **currently inviting graduate students and postdocs** to prepare a poster on their research results in communications and related fields. Master students, PhD candidates, and post docs are encouraged to participate by submitting a title and a short abstract of about 250 words to the poster session coordinator Prof. Hong Man (hong.man@stevens.edu). If the title and abstract are of sufficient quality and in the scope of the symposium, the prospective poster presenter will receive an invitation to present a poster at the symposium. An electronic version of the poster is due on **September 15, 2013**. The poster presenters should bring a printed version to the symposium. The posters will be further evaluated prior to and during the symposium, based on the research results, the poster, and the presentation of the results. The three best posters will receive **2013 IEEE North Jersey Section Communication Poster Awards**. The first, second, and third place winners will receive prizes of \$ 400, \$ 300, and \$ 200, respectively. All poster presenters will receive participation certificates. The symposium fees are waived for poster presenters.
